

Differential pressure gauge with inductive contact type

Model: P690 series

Spec. sheet no. PD06-07

Service intended

P690 differential pressure gauge series are designed to measure differential pressure from 25 kPa to 2.0 MPa at Max. working pressure up to 10 MPa and have inductive contact. P690 series are designed to control alarm for differential pressure, providing the right time to replace air and sludge filter during the process.

Nominal diameter

160 mm

Accuracy

±1.6 % of full scale

Scale range (MPa, kPa, bar, mbar)

0 ~ 25 kPa to 0 ~ 0.25 MPa

0 ~ 0.4 MPa to 0 ~ 2 MPa

Max. working pressure (Static pressure)

Max. 10 MPa

Working temperature

Ambient : -20 ~ 65 °C

-40 ~ 65 °C (With silicone filling)

Fluid : Max. 100 °C

Degree of protection

EN60529/IEC529/IP65

Temperature effect

Accuracy at temperature above and below the reference temperature (20 °C) will be effected by approximately ±0.5 % per 10 °C of full scale

Standard features

Pressure connection

Stainless steel (316SS)

Inductive alarm sensor model P690 series

Service intended

WISE inductive contacts are certified for use in hazardous areas of zone 1 and zone 2.

Power supply must be made by means of a power source certified intrinsically safe such as Pepper and Fucus model KFA6-SR2-EX1.W

Inductive contact are also recommended for critical non-hazardous applications where an utmost of failsafe heavy duty operation is required.

In combination with liquid filled instruments these contacts are particularly suited for process control circuits in the chemical and petroleum industry.

Operating principle

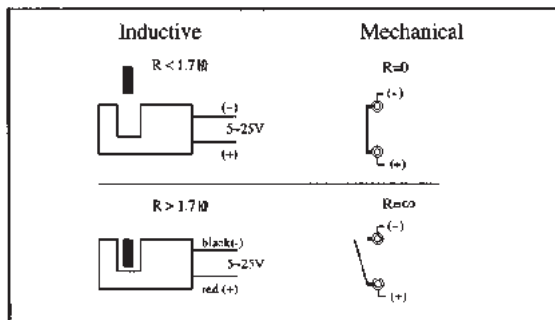

At the heart of the WISE inductive contact system is a noncontact sensor attached to an pressure gauge.

Both sensor and gauge are adjustable over the full length of the scale. Contact actuation is achieved by means of a Control vane linked to the pointer of the gauge.

The Control vane affects the electric field of the sensor when the instruments pointer overlaps with the contacts indicator.

Contact actuation is made without any mechanical force that would affect accuracy of the gauge.

The scheme below reflects the operating principle in comparison with conventional mechanical contacts :

Dimensions of the basic instrument and provisions for contacts adjustment are identical to contacts of model P500.

Operating temperature: $-25^{\circ}\text{C} \dots +70^{\circ}\text{C}$

Used sensor (slot-type initiator):

Type SJ of the company Pepper and Fuchs, EC-Type

Examination certificate PTB 00 ATEX 2081

Advantage of the WISE inductive system

- Long Service life by means of non-contact sensor
- Very little effect on gauge accuracy
- No reduced rating with liquid filled gauges
- Fully suitable in corrosive or hazardous atmosphere
- Ex-approved for service in hazardous area of Zone 1 or 2

Components of the WISE inductive contact system

Operation of the inductive contact system requires an appropriate electronic power supply and control unit

The Safety Barrier consists of

- Line transformer
- Amplifier circuit
- Relay to switch external circuit

The isolated line transformer provides for power supply whereas the amplifier conditions the signal of the inductive sensor to energise the output relay

Available are two versions of control units

- Ex-approved intrinsic safety
- Standard for non-intrinsically safe version (optional)

Safety barrier model KFA6-SR2-Ex1.W

- Intended for instruments having one inductive contact incorporated
- Alarm circuit certified intrinsically safe [EEx a] IIC
- Provides 1 SPDT relay output contact
- LED indicating circuit status (green), relay output (yellow) and lead breakage (red)
- Case surface mounting type Form A

Note

Directions of action adjustable by sliding switch S1 :
 Open circuit causes alarm : Switch S1 in position I
 Closed circuit causes alarm : Switch S1 in position II

Safety barrier model KFA6-SR2-Ex2.W

- Intended for 1 instrument having two inductive contacts, or two instruments having one inductive contact incorporated
- Alarm circuit certified intrinsically safe [EEx a] IIC to EN 50 227 and NAMUR
- Provides 2 SPDT relay output contacts
- LED indicating circuit status (green), 2 x relay output (yellow) and 2 x lead breakage (red)
- Case surface mounting type Form B
